# ISO-TURN with ISOFIX connection

## Instruction manual

### Before using the ISO-TURN

To ensure the safe use of the ISO-TURN please read and use the instruction manual and especially the safety arrangements. Please understand that the instruction manual may be different to the various designs of the product.

Keep the instruction manual well. A warranty card is attached on the last page. Please keep it carefully so you can submit the warranty card in case of a defect. The instruction manual always have to be present also if you commit the product to others or lend it.

## SAFETY ARRANGEMENTS

Attention (this symbol means that misuse can cause a high risk of death or injury.)

The following car seats are not suitable for the use with the ISO-TURN:

- car seats without ISOFIX connection
- car seats which are fixed sideways or backwards
- car seats which are less than 40cm deep
- car seats with a pronounced bulge on the seat which can lead to an unstable attachment
- car seats with an two-point seat belt

### **What you should be aware of before using the ISO-TURN**

Please transport your child with the five-point seat belt of the Carrot/Carrot II and with the three-point seat belt of the car. A modification of the product is your responsibility. We are not responsible for any damage in case of a incorrect modification. Only the accompanying person should handle the product. Just for the use in vehicles which are equipped with a three-point seat belt. Please pay attention when installing that no part of the ISO-TURN can be wedged by a movable seat or in the door if you use it the normal way.

An insufficiently fixed ISO-TURN can cause a high risk of death or injury. Use only for specified children and only with the above-described car seats. We recommend the space behind the front passenger. Regular checks are necessary if you drive on bad roads as well as before and after a ride. The instruction manual always have to be attached to the product. Do not forget this if you let it to other+persons.

Make sure that the ISOFIX connection of the ISO-TURN is properly locked with the car seat. This applies also if you travel without a child in the car seat or there is no car seat on the turntable. Without the adjustment the turntable could injure inmates in case of an accident.

Do not use a car seat without a ISOFIX connection to guarantee the safe of the patient.

Secure your baggage that you do not get injured in the event of an accident.

Please do not leave your child unattended in the car.

### **When you should not use the ISO-TURN**

Please do not use the ISO-TURN if it not fixed correctly as described in the instruction manual and also if the ISO-TURN is not firmly locked even after fitting. Do not use this product without an ISOFIX connection of the car seat. Do not use other seat belts or forms than those that are described in the instruction manual. To ensure safety please do not use the product any longer if it was involved in an accident. If the ISO-TURN is fixed on the front passenger seat and impede you actuating the gear shift and the handbrake you should not use it. Do not use seat belts that are damaged, e.g. by cigarettes burns.

### **What also should be noticed**

The ISOFIX connections can not be solved easily. But you should still pay attention that nobody handle it improperly. If you have any further questions regarding to the use of this product or the repair work please do not hesitate to contact your dealer.

Some cars have in the foot rest area an integrated storage shelf. If the foot well brace should stand on such a shelf the stability in a crash situation is reduced. Please contact your dealer. We will give him a solution for this problem.

## Use of the ISO-TURN

RULES how to fix:

### **1. Fix the Carrot/Carrot II on the ISO-TURN**

At first please solve and remove the adjustment screws of the Carrot/Carrot II. Now put the car safety seat on to the turntable so that the back of the seat is between the holders of the back angle adjustment. Please mount the Carrot/Carrot II on the ISO-TURN with the bolts that keep the seat and the back of the car safety seat together. The screws should be firmly tighten on both sides of the seat. After that please screw the clamp lever for the back angle adjustment in to the designated holes.

### **2. Proper fix on to the car seat with the ISOFIX connection**

Now place the ISO-TURN with the attached Carrot/Carrot II on to the car seat. Please note that the ISOFIX connection of the ISO-TURN and of the vehicle are the same height. Just after that you can insert the ISO-TURN into the ISOFIX connection of the car seat until it clicks hearable into the right place.

### **3.Back angel adjustment**

The back of the ISO-TURN and of the Carrot/Carrot II can be fitted to the back of the car seat if you solve the clamp lever at the back angle adjustment. Please push the back frame of the ISO-TURN according to the inclination of the car seat. Now fix it again with the previously dissolved clamp lever. Make sure that the clamp lever is firmly applied. After that you can adjust the back of the Carrot/Carrot II to the car seat.

### **4.Adjustment of the footwell brace to the footwell**

First of all loose the screws of the footwell brace on the underneath of the ISO-TURN. Afterwards you can adapt the brace to the depth of the car's seat. Then tighten the screws firmly. Now loosen the three screws on the footwell brace to cease the height. Leave the brace glide to the car floor and then tighten the bolts firmly.

### **5. Spinning process**

In order to turn the ISO-TURN the indexing plunger have to be unlocked. The indexing plunger is located at the top of the rotation plate, drag it upward to unlock. Now you can turn the Carrot/Carrot II with the ISO-TURN in the direction of the car door to exit it. After that you can fix the turntable with the indexing plunger in the desired position. You should make sure that the indexing plunger snaps into the right position.

### **6. How to remove the ISO-TURN**

You have to unlock the ISOFIX connection to remove the turntable. Unlock of the ISO-TURN by pushing the black balls in the driving direction on both sides, push the ISO-TURN some millimeters back to loose the ISOFIX hooks out of the mounting link, lift it up and then pull the turntable. Now you can remove the Carrot/Carrot II with the ISO-TURN from the vehicle.
